Better Ideas for Schooling

About Intellisis

Better Ideas for Schooling

Intellisis Resources Pvt. Ltd. incorporated in 2005 envisages a system of school education which promotes the development of multi-skilled, confident, independent and articulate children who love to learn. Conceptualized by industry stalwarts having more than 10 years of experience in the field of competitive, basic education and allied services. The core team is the same which is behind success of Bulls eye, a premier national level MBA preparatory chain with a student strength of more than 5000.

We know that our children are the most precious resource of our community and we need to nurture them by providing the very best education possible in a scientific manner which imbibes problem solving & decision-making skills with a questioning mind. Keeping this very important aspect in mind, Intellisis has come out with KG Pro™, a unique kindergarten programme that is grounded in scientific principles keeping the above said larger objectives in mind. Intellisis bridges this gap with its scientifically designed KG Pro™ modules where the schools, teachers and parents can give children a complete learning experience which will help them in honing the necessary skills in their respective age groups.

KG Pro™ has been developed, nurtured & refined since the last three years under the supervision of a team consisting of renowned academicians and experts in the field of education from the best schools in the Country. KG Pro™ is a sophisticated and pre tested

programme. This is not a run of the mill programme which has leaped straightway from the design board to offering. KG Pro™ has been incubated at Mind Tree School, Ambala. Mind Tree School, Ambala is one of the most progressive and modern schools in the region. The Mind Tree School, Ambala has been running successfully on the systems & books designed & developed by Intellisis under the KG Pro™ programme. The results since last two years have been extremely satisfying & encouraging.

KG Pro™ is the only complete and systematic programme designed to run Kindergarten in the Country. Modules are designed specifically for each age groups (2.5yrs to 5.5 years); keeping in mind the requirements of the children, the parents, the teachers and the school.

About Intellisis

Why KG Pro™?

Enriching Childhood ...

The child-centered kindergarten is not new; it has its roots in the 19th century. At that time, the kindergarten was envisioned as a "garden for children" (the literal meaning of the German word "kindergarten"), a place where children could be nurtured and allowed to grow at their own pace.

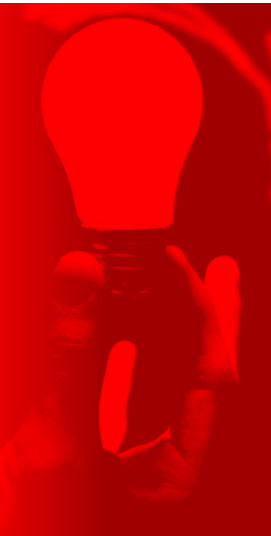

A Child has to build skills in six different areas of development. These Developmental areas are:

- I. Physical & Motor Skills
- II. Cognitive Development
- III. Environmental Studies
- IV. Socio - Emotional Development
- V. Creative Development
- VI. Language Development

After a comprehensive study of various schools & understanding their systems, we at Intellisis believe that there is a tremendous scope for improvement to achieve these Developmental Milestones in a systematic and scientific manner.

KG Pro™ is an exceptional educational programme that introduces academics through activities which not only invigorate the mind of a child, but also boost independence, confidence and self esteem. The KG Pro™ system enables children to capture their imagination, and offers them a learning environment where they can make discoveries, solve problems and think independently. A core belief at Intellisis is that no single method of instruction is all comprehensive. Hence, we have come up with a Melting Pot Approach which uses both - traditional and progressive methods of instruction, to develop a well rounded curriculum that encourages social, academic and emotional growth of the child. Listed below are some of the benefits.

- ➔ Integrated, Cohesive and Systematic plan for all the Three years of Kindergarten
- ➔ Well designed teaching Manuals which encompass day-to-day teaching plans, activities with clearly defined objectives.
- ➔ Better quality from uniformity of schooling which minimizes teacher-to-teacher variation in quality as well as methodology.
- ➔ Simple to implement and easy to monitor from administrative viewpoint.
- ➔ Lighter Schoolbags - Happy Children ! Happy Parents !
- ➔ Involves critical thinking which propels children to acquire skills that involve problem solving, decision-making, questioning, evaluating and discovering.
- ➔ An efficient system that saves the Management and Teachers time & effort.
- ➔ Increases productivity of teachers as every detail has been structured, coordinated and planned.

"Melting Pot Approach" unites the positive attributes of the following methods:

- Theme Based Method
- Project Method
- The Montessori Method
- Multiple Intelligence Method

Melting Pot Approach

Melting Pot Approach

Guiding philosophy

- To provide education through effective and innovative teaching methodology.
- To provide students with essential skills, knowledge and techniques that prepare them for life in a global and competitive environment.
- To provide a safe, supportive and positive teaching environment that meets the needs of each student.
- To imbibe values & principles that help them in becoming responsive citizens and leaders.

With the plethora of techniques being used by different schools to impart education in kindergarten, it becomes subjective / debatable as to which is the best approach in imparting the complete learning experience. Intellis introduces a hybrid system of KG education which is a combination of the Best Features of various approaches that are used the world over to provide quality learning to kindergarteners. It is the "Melting Pot Approach". The "Melting Pot Approach" unites the positive attributes of the following methods:

- Theme Based Method
- Project Method
- The Montessori Method
- Multiple Intelligence Method

Moreover, Teachers are encouraged to use a wide variety of teaching strategies and materials to help children learn the knowledge and skills specified in the KG Pro™ programme. Our professional development provides teachers with many options for teaching, including planning activities, incorporating learning by doing, Montessori Method and so on.

Benefits From KG Pro™

School Management

- The programme facilitates effective planning and monitoring to identify gaps in learning and ensures that important knowledge and skills are not omitted.
- It is based on cognitive psychology research and planned correlation with other kindergarten programmes, thereby boosting a school's reputation.
- There is consistency in content and experiences presented to kindergarteners. Children entering kindergarten have common base of knowledge and skills.

Teachers

- The sequential and explicit goals allow teachers to make knowledge and skills accessible to the students in small manageable steps. Children are always ready to learn if the teacher knows where to start.
- The teachers assume an interactive role in guiding and presenting activities, along with instructing.
- The teacher's approach is towards the development of each child with regard to the class and to encourage socially responsible behavior and respect for each other.

Children

- The classroom activities and experiences are based on explicit guidelines that specify essential knowledge and skills for all kindergarten children.
- There is a balance of activities and experiences across all developmental areas, namely, physical, social & emotional, language, environmental, cognitive and creative development.
- It facilitates easy transformation of children from a KG environment to that of the main stream education.

Benefits

Product Details KG Pro™

- The KG Pro™ is designed to cater to three age groups in a cohesive manner.

Level 1	2.5-3.5 Years
Level 2	3.5-4.5 Years
Level 3	4.5-5.5 Years

The syllabus is structured to cater for 150 working days of School. A few additional days have been provided for unforeseen holidays, events and for providing cushion. As the children move from one level to another, there is an enhancement in various skills in all the six targeted developmental areas.

- The R&D team at Intellis is under KG Pro™ has designed a total of 20 theme based workbooks for each Level. The curriculum is divided in to 10 different themes, each theme comprising two books, Learn at Home™ and Learn at School™ (one for Class & one for Home). Home books are designed to reinforce the classroom learning. Apart from these basic 20 Books, every level has additional books to enhance further learning.

- In a typical day at school a child will carry two books (one for Class & one for Home) and a school diary.

After every 15 working days, set of books is replaced by next set of books, thereby covering ten themes in 150 days.

- Every theme has a teaching manual which guides the teacher in a comprehensive manner. It includes details of activities, physical objects required for teaching, tools for imparting skill and knowledge through a feedback mechanism.

- A team of experts from Intellis will train school teachers to use the books & teaching manuals in every detail. This team will also make them aware of every aspect of the programme and will familiarise them with core aspects of the modules and the methodologies which they will follow for optimum results.

- Apart from training teachers the Intellis team will supervise closely the implementation of the KG Pro™ systems. There will be routine & surprise checks to verify whether the teachers are following the programme as per schedule and to provide necessary remedial actions / suggestions in case deviations take place.
